

FVX-SPRAYER

DESIGNED FOR THE QUICK APPLICATION OF VACCINATIONS

Compact handsprayer makes vaccinating a breeze

The **FVX-Sprayer** is a **vaccination sprayer** that is much compacter than other common models. It is the perfect tool for quick vaccination. It is a sturdy sprayer of good quality. The unique aspect of the FVX-Sprayer is that the **droplets are electrostatically charged**. This automatically attracts them to surfaces, creating a compact spray pattern. The sprayer has a throw length of two metres. You can use it to make lanes of six metres in the stable.

FOGGING & HYGIENE
