

# POWERFOGGER 5

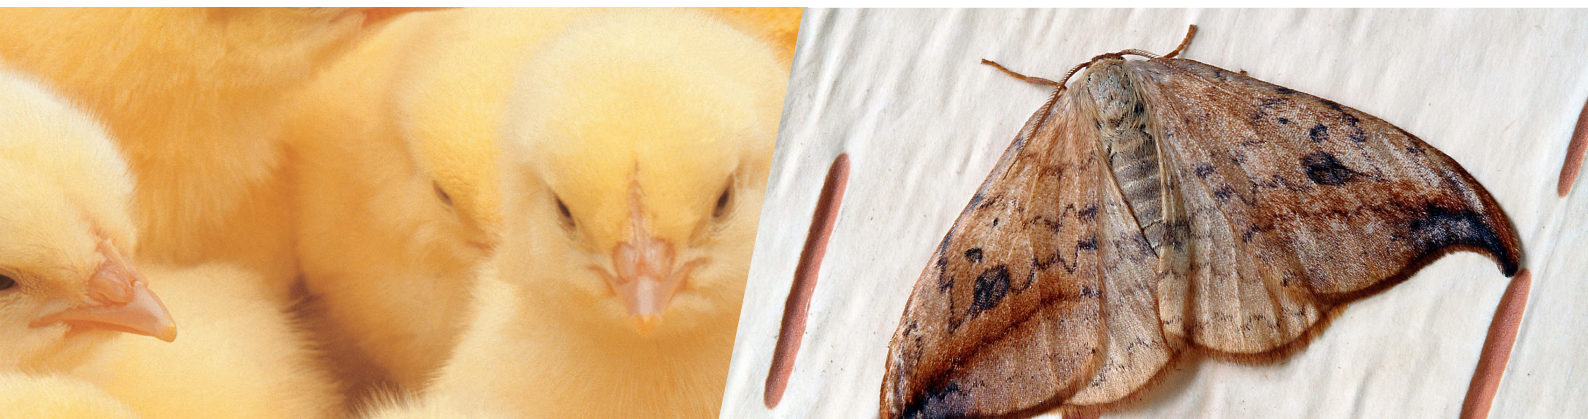

POWERFUL ELECTRONICAL FOGGER FOR DISINFECTING AREAS

## Up to 1000 m<sup>3</sup> pure power

This is the smallest member of our Powerfogger range. Compact, but that isn't noticeable looking at the power of this machine. It can handle rooms up to 1000m<sup>3</sup>. **This machine comes with a lot of conveniences: a strong degree of automatization and a selfcleaning proces after use.** This prevents residue build-up, so you never have to be afraid of blockages. This machine is most suitable for treating pests, and for disinfection rooms. For example: on poultry farms, in the food industry or in mushroom production.

Depending on the options on your fogger, your product may look different from the image.

FOGGING & HYGIENE

# POWERFOGGER 5

POWERFUL ELECTRONICAL FOGGER FOR DISINFECTING AREAS

## Specifications

- electrically driven motor: 230 V/50 Hz
- 60 Meter effective fog throwing range
- Adjustable droplet size
- 5 liter liquid tank, 5 liter rinsing tank
- Troublefree and simple operation
- Easy level indication thanks to transparant solution tank
- **Automatic cleaning system** – No blockages
- Most suitable for pest control in storerooms, public sanitation, bacterial disinfection and the neutralization of odours

### Capacity

20 - 35 litres per hour.

### Tank size

5 litres.

### Air throw

60 meters.

### Power

230 V.

### Droplet size

20 - 30 µm.

### Mobility

Mobile  
but not during fogging.

**MAINTENANCE-FRIENDLY, EASY TO  
DRIVE BUT ABOVE ALL:  
UP TO 1000 M<sup>3</sup> PURE POWER**
