

POWERFOGGER V60

POWERFUL FOGGER GREAT FOR PIG STABLES

Simply the best results

The Powerfogger V60 is specially designed for **spraying disinfectants, pest control or probiotics** in small compartments. A versatile and easy to operate nebuliser specially designed for use in pig houses. With its powerful air pump, the Powerfogger can nebulise 20 litres per hour, making it easy to disinfect or treat several sections against flies. By leaving the Powerfogger outside the section, the treatment is easier and there is no possibility of cross-contamination between the sections. The Powerfogger V60 is versatile and, due to the labour savings, pays for itself quickly.

Depending on the options on your fogger, your product may look different from the image.

FOGGING & HYGIENE
