

PULSFOG K10

VERSATILE THERMAL FOGGER WITH LOADS OF POWER AND CAPACITY

The ideal thermal fogger for lightweight fogging

The main reason to choose for a Pulsfog is power and speed. The ratio between cost and size on the one side, and capacity and power on the other side is unmatched. The foggers of the Pulsfog series are not bound to cables or tubes and can therefore be used on, and from any location. **The Pulsfog K10 is often used for disinfecting spaces and for crop protection. They're also very useful in the poultry industry.** With the optional flame nozzle you can reach even the deepest grooves in floors, to burn the eggs of insects. Its air throw of 30 meters and its compact size makes it best suited for companies with multiple smaller areas.

Depending on the options on your fogger, your product may look different from the image.

FOGGING & HYGIENE

PULSFOG K10

VERSATILE THERMAL FOGGER WITH LOADS OF POWER AND CAPACITY

Specifications

- Weight while empty: 8,5 kg
- Gas tank with scale display, without pressure
