

PULSFOG K22

VERSATILE THERMAL FOGGER WITH LOADS OF POWER AND CAPACITY FOR A FAIR PRICE

Powerful and limitless

The main reason to choose for a Pulsfog is power and speed. The ratio between cost and size on the one side, and capacity and power on the other side is unmatched. The foggers of the Pulsfog series are not bound to cables or tubes and can therefore be used on, and from any location. The Pulsfog K22 is often used for disinfecting spaces and crop protection. They're also very useful in the poultry industry. It's compact size makes it useful in many different spaces, even if the walkways are too narrow for other foggers. With its air throw of 50 meters it's most suitable for companies with medium size areas.

Depending on the options on your fogger, your product may look different from the image.

FOGGING & HYGIENE

PULSFOG K22
