

PULSFOG K30

THERMAL FOGGER WITH POWER, CAPACITY & LARGE AIR THROW DISTANCE

Large rooms in little time

The main reason to choose for a Pulsfog is power and speed. The ratio between cost and size on the one side, and capacity and power on the other side is unmatched. The foggers of the Pulsfog series are not bound to cables or tubes and can therefore be used on, and from any location. The Pulsfog K30 is mostly used for disinfecting spaces and crop protection. They're also very useful in the poultry industry. The throwing distance of 70 meters means you can cover large surfaces in short amounts of time. It is the largest portable model. But its compact size still makes it useful in smaller spaces. This is the most powerful portable model. The K30 is most suitable for companies with larger areas. If you need even more air throw and power, check out the largest model, the K40.

Depending on the options on your fogger, your product may look different from the image.

FOGGING & HYGIENE

PULSFOG K30

THERMAL FOGGER WITH POWER, CAPACITY & LARGE AIR THROW DISTANCE

Specifications

- Measurements: 146 x 38 x 47 cm
- Weight while empty: 15 kg
- Gas tank with scale display, without pressure
 - Volume gas tank: 20 liters
 - Average gas usage: 7,6 liters per hour
- Pulsfog quickstart system by gas injection
- Double liquid injection for optimal fogging results (K-3/20 BIO)
- Separate liquid cooling for fogging of biological liquids and dissolvable powders

Capacity

40 - 100 liters per hour.

Tank size

10 (Portable model),
50, 100 or 150 liters.

Air throw

70 meters.

Power

90 HP.

Droplet size

25 µm.

Mobility

Portable
or optionally with a cart.
