# DISINFECTION

## HALOFOG 400, COMPLETE DISINFECTION WITH THE PUSH OF A BUTTON

The spray nozzle uses compressed air to inject a very fine, dry mist into the trailer. This dry mist ensures that the surfaces remain dry and that the disinfectant can penetrate into all nooks and crannies. Not only the trailer, but also everything inside the trailer, such as trolleys, crates and boxes, is disinfected.

### WHY CHOOSE OUR HALOFOG?

#### 1. Thorough disinfection

Halofog guarantees thorough disinfection of all surfaces, including hard-to-reach areas where traditional methods fall short.

#### 2. Savings in time and labour

Fully automatic atomisation system: disinfection is faster, labour-saving and without downtime.

#### 3. Cost reduction and precision

Optional automatic dosing prevents waste of product and water – efficient and sustainable.

#### 4. Prevent recalls

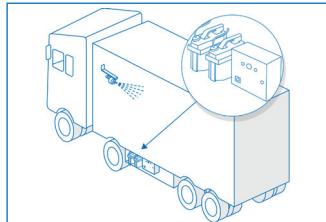

Reliable and reproducible disinfection reduces the risk of microbiological contamination and thus costly product recalls or damage to your image.

#### 5. Safe in food environments

Halofog meets the highest standards for food safety – without compromising on effectiveness.

### ADVANTAGES OF THE HALOFOG

- ✓ Fully automated system
- ✓ Capacity expansion possible via additional spray nozzles
- ✓ Spray nozzles powered by compressed air
- ✓ Optional automatic dosing system
- ✓ Less exposure to chemicals for personnel
- ✓ Lower use of chemicals and water
- ✓ Fewer errors due to consistent operation

## WDU

**The Wheel Disinfection Unit (WDU-Basic)** disinfects the tyres while driving. Nozzles on each wheel are connected to a central tank and can be activated from the cab.

0-16 liters  
per minute

+/- 45 liters

## TDS

**Truck Disinfection Station:** robust, mobile or fixed, with automatic or manual operation. Complete disinfection of trucks, including chassis. The reliable gatekeeper for your premises.

Connected to the water supply.

## TURBOFOG

An electric fogging device. Thanks to its **handheld size** and **complete equipment in stainless steel and Viton**, it can be used with practically all liquids and in all conditions. Even in small spaces.

# HYGIENE SOLUTIONS FOR THE TRANSPORT SECTOR

## SMARTER. CLEANER. SAFER.

With over 35 years of experience, Veugen Technology is the specialist in professional hygiene solutions and atomisation technology. As a family business with roots in the agricultural sector, we now also serve customers in the food industry and the transport sector. **Our mission: to offer customised solutions that allow you to maintain control over hygiene in your business.**

## WHAT WE DO

We supply everything you need for effective disinfection and hygiene management.

- Production and sale of atomisation equipment
- Supply of cleaning and disinfecting agents
- Room disinfection of greenhouses, stables, buildings, etc. (Veugen High Care)

## HOW OUR FOGGING EQUIPMENT CAN SUPPORT YOU?

Hygiene is becoming increasingly important and complex.

With our techniques, you can:

- Disinfect yourself at a time that suits you
- Automate hygiene processes and save time
- Save on resources and water through precise dosing
- Guarantee the quality of your environment without compromise

With five different fogging techniques, customisation and our own droplet size measurements, we guarantee the right solution!
