

SANIFOG

THE LIGHTWEIGHT ELECTRICAL FOGGER

Portable hygiene

The Sanifog is the most compact fogger in our assortment. But you could not tell that by looking at its tank size. The 4 litres tank allows you to fog a large area without having to refill. There is also a valve for adjusting the flow rate, so you can go even further with a single tank. This makes the Sanifog suitable for treating large areas up to 500m³. At only 4 kilograms when empty, this is a very portable fogger. The fogger and tank are connected by an angle-adjustable hinge. This helps to get to difficult to reach places, while staying in a relaxed posture. The Sanifog can be used for a number of appliances, like crop protection, disinfection and pest control.

FOGGING & HYGIENE

SANIFOG

THE LIGHTWEIGHT ELECTRICAL FOGGER

Specifications

- Light and portable fogger
 - 4 kilos when empty, 8.5 kilos when full
