

CHICK PAPER

100% BIODEGRADABLE, ENSURES BETTER CHICK LIVING CONDITIONS

Give your chicks a head start

Chick paper stimulates the chick to search for food and water. When the chicks walk over the poultry paper, the rustling sound of the poultry paper draws the attention of other chicks. Because the chick paper is placed underneath the food and water, the chicks have easy and fast access to their important first needs in the critical first hours. Chick paper improves the weight gain in the first 7 days. The poultry paper is 100% biodegradable, therefore it does not need to be removed from the chicken house. After a few days it has completely disappeared. We also offer a heavier version of chick paper. This is thicker and the advantages will last longer.

FOGGING & HYGIENE

CHICK PAPER

100% BIODEGRADABLE, ENSURES BETTER CHICK LIVING CONDITIONS

Specifications

- 2 x 0,68 meter width x 220 meters long (per box)
- 36 boxes / pallet
- **Gives chicks a good start**, because of easy access to feed from drinking line
- Proven higher yield
- Strongly absorbent
- Good degradation in dry stable
- Better weight gain in the first 7 days
- Better spread of chickens throughout stables
- Easy to handle
- Also available as cut-to-fit
- **Hygiene:** boxes are sealed in plastic. Pallet is sealed in plastic incl. Top of pallet

	NORMAL	HEAVY
Use	2 - 3 days	5 - 7 days
Measurements	220 x 68 cm	220 x 68 cm

Packing units

CARTONS	PALLETS	CONTAINER
36 cartons	1 pallet	
468 cartons	13 pallets	20 ft container
936 cartons	29 pallets	40 ft container
1188 cartons	33 pallets	FTL

QUALITY CHICK PAPER FOR A FAIR PRICE.

The quality of our paper is checked after every production.

We want it to be strong and flexible enough, so it doesn't tear when unrolling, without effecting the breakdown time in the poultry house. The dotted lines indicate our minimum values for the strength of the paper and the elasticity and flexibility.
