POWERFOG TB10 | 230V

THE COMPACT AND COMPLETELY AUTOMATIC FOGGER

Powerfog TB10 for good results in less time

De Powerfog TB10 combines a large fog capacity with a qualitative droplet size (Measurement report available). The complete greenhouse can be filled with small droplets within a short period of time to get an uniform coverage of fog for the best results. The complete automated controls make the Powerfog TB10 easy to use and make a preventative treatment the new standard. With the Powerfog TB10 you can save on a considerate amount of spraying hours with just one push of the button.

Depending on the options on your fogger, your product may look different from the image.

FOGGING & HYGIENE

VEUGEN TECHNOLOGY

POWERFOG TB10 | 230V

THE COMPACT AND COMPLETELY AUTOMATIC FOGGER
